

How to make Cloud Dough Recipe

Cloud Dough which can sometimes called Moon Sand is a homemade mixture used for sensory play experiences.

The consistency of Cloud Dough can be powdery like flour and also mouldable, a bit like damp sand. It is perfect for moulding, shaping, squeezing, pressing and sculpting into different shapes.

Cloud dough has a silky smooth texture and scented by the baby oil. It provides a great hands-on sensory learning experience for children.

What you will need?

4 Cups of Plain Flour

½ Cup Baby Oil

Large tub and wooden spoon for mixing

This recipe provides a descent amount of cloud dough for one or two children to play with. I double this recipe when using it in the classroom for 3 children of more at one time.

How to make it?

1. Measure and pour the flour into the large tub.
2. Add baby oil.
3. Mix with a wooden spoon.
4. Using your fingers, squeeze and press the cloud dough to blend the oil throughout the flour.
5. Store in an air tight container.

Please Note:

Please always supervise young children around things that they may place in their mouths. Baby oil should not be ingested.
